

Campa series

Designed by Spant Studio, Denmark

The Danish design studio, Spant Studio, is behind Campa. A series of lamps, where each one takes ownership of its unique signature, but where the distinctive design is echoed in all versions. The inspiration behind the design was to create a simple design without too many components, which would still catch the eye. The light source and shade's material have been carefully selected to do just that. The shade is made of opal glass, which creates a calming atmosphere for the eye and mind. The design of the shade creates a downward light, as well as through the semi-transparent glass, and the small grooves on the side of the shade are a stylish detail.

Meet the designer

As the world grows ever more complicated, we strive to create simple and meaningful getaways, retreats and pieces of design with a unique experience for the demanding customer. The spaces that surround us have great impact on the quality of our lives. Hence, we dedicate our professional lives to contribute to the Scandinavian heritage of architectural design – the art of designing holistic and immersive experiences. We really do believe that simple and attractive aesthetics can heighten the feeling of being alive and add a certain degree of mental health to our existence. Our wish is to design objects that hold the potential of achieving that goal. We design objects when we are presented to a given possibility to contribute with something beautiful and meaningful. It is not a crusade but an invitation.
